Section Title	Environmental Policy					

Environmental Policy

Erlson Precision Components (EPC), based in Skelmersdale, is a specialist manufacturer of small, medium-to-high volume, high precision components for automotive turbochargers, advance fuel delivery systems, fluid power and similar close tolerance applications.

EPC wishes to operate its business with minimal effect on the environment and have developed an Environmental Management System that is externally certified to ISO 14001. Annual environmental objectives have been set to facilitate continual improvement in the environmental performance of the business and to ensure that EPC comply with legal and other requirements and prevent pollution. The environmental objectives relate to:

- Energy use and management
- Waste and packaging volumes
- Oil and coolant usage
- Noise sources
- Employee awareness and participation in environmental management

All staff, contractors and visitors to site have a role to play in EPC achieving the above objectives and this Policy is available to anybody who requests it. Environmental training and information will be provided to staff and others as appropriate.

EPC will monitor and regularly review the EMS to ensure its continued suitability and to guide continual improvement of site operations.
